Patent No. US20020151002A1

GENERAL INFORMATION:
APPLICANT: Flint, Dennis
APPLICANT: Viitanen, Paul
TITLE OF INVENTION: Banzoot/Blucose:Malate Sinapoyltransferase Form Malate Conjugates
TITLE OF INVENTION: Benzoic Acid Glucosides
FILE REFERENCE: BC1034 US NA
CURRENT APPLICATION NUMBER: US/09/896,866B
CURRENT APPLICATION NUMBER: 2001-06-29
FRIOR APPLICATION NUMBER: 60/216,615
FRIOR APPLICATION NUMBER: 60/216,615
FRIOR APPLICATION NUMBER: 60/216,615

Patent No. US2002002715A1

FRENERAL INFORMATION:
APPLICANT: WITTANEN, PAUL V.
APPLICANT: WAN DYK, DREW
TITLE OF INVENTION: HIGH LEVEL PRODUCTION OF P-HYDROXYBENZOIC ACID
TITLE OF INVENTION: HIGH LEVEL PRODUCTION OF P-HYDROXYBENZOIC ACID
TITLE OF INVENTION: HIGH REEN PLANTS
FILE REPERENCE: BC1015 US NA
CURRENT APPLICATION NUMBER: US/09/855,341
CURRENT FILING DATE: 2001-05-15
NUMBER OF SEQ ID NOS: 16
SOFTWARE: MICROSOFT OFFICE 97
SEQ ID NO 3
LENGTH: 495
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Length 495;

Published_Applications Mucleic Acid and Published_Applications Amino Acid database searches now reduce the amount of time required for their daily updates. This results in more machine time being available for processing searches.

Mewly publications make up the Published_Applications_Mem databases, applications make up the Published_Applications_New databases; older published

Searches run against Nucleic Acid Published Applications produce two sets of results, with the extensions rupbm (Published Applications NA Main) and .rnpbm (Published Applications Acid Published Applications produce two sets of results, with the extensions rapbm (Published Applications AA Main) and .rapbm (Published AA Main) and .rapbm (Pub

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Patent No. 6210937

GENERAL INFORMATION:
TITLE OF INVENTION: DEVELOPMENT OF GENETICALLY
TITLE OF INVENTION: DEVELOPMENT OF RECTRIA FOR PRODUCTION
TITLE OF INVENTION: OF A SPECIFIC PLASTICS PRECURSOR
NUMBER OF SEQUENCES: 26

CORRESPONDENCE ADDRESS:
ADDRESSEE: W. Gary Goodson

i Sequence 7442, Application US/09252991A

i Sequence 7442, Application US/09252991A

i Patent No. 6551795

i GENERAL INFORMATION:

i PAPLICANT: Marc J. Rubenfield et al.

i TITLE OF INVENTION: NUCLEIC ACID AND AMINO ACID SEQUENCES RELATING TO PSEUDOMONAS

i TITLE OF INVENTION: ARUGINOSA FOR DIAGNOSTICS AND THERAPEUTICS

i TITLE OF INVENTION: 10916.136

i CURRENT APPLICATION NUMBER: US 60/074,788

i PRIOR PELING DATE: 1998-02-18

i PRIOR PILING DATE: 1998-02-18

i PRIOR PILING DATE: 1998-07-27

i NUMBER OF SEQ ID NOS: 33142
